

# Flexagon Folding Instructions

## 1. Print

Use regular paper, or 90lb cardstock (more durable)

## 2. Cut out

## 3. Pre-crease all folds

## 4. Fold in half

## 5. Fold in on itself

Fold in rightmost triangle, then fold under and around so that only the ecosystem face shows

## 6. Glue first flap

Fold last triangle up over the others, then glue

## 7. Invert and glue again

Invert to reveal organism face, then glue 2nd flap
